Content outline – Danny Aguirre

Project Title: Kanye West Website

I would like to build this site as multiple pages. There is a lot of possible content that I could use that is related to Kanye, but not so much to themselves. I will probably have some way of navigating through the pages with a navigation bar.

Pages to include:

- **Home Page –** Introduce Kanye and the many things he does/is involved in.
- **Early Life/Personal life –** Focus on Kanye west and his influences in his life that can be seen in his music
- **Career/Musical Style/Albums –** Focus on his career, planning on displaying the various album covers in a page info about the musical style
- **Other ventures (mostly fashion) –** Talk about other projects Kanye has done, focusing on shoes and fashion
- **Impact/Achievements –** How he has made his mark in hip-hop and his achievments
- **Sources –** page with list of sources
